### EQUIP & WORK

We are a Personal Protective Equipment (PPE) supplier committed to delivering the right PPE solution for each client and for every work situation.

### TRAIN & WORK

We provide workplace safety training. Our training results in effective safety measures used on the job. Because a danger of accidents always exists.

### RENT & WORK

Have a short-term or specialized need? We offer top quality instruments and PPE for daily & weekly rentals. Renting PPE can cost a fraction of the price to purchase.

### INSTALL & WORK

Whether you want us to fully install your fall protection solution or certify that the system was installed correctly, we will ensure you that it is safe to use.

### INSPECT & WORK

We are authorized to inspect and certify FPE & PPE. We send you timely reminders to ensure that your products always remain fully safe and functional.

T+31(0)346-555 622

Felix Safety is currently operating in more than 30 countries. We provide PPE & FPE products directly to our retailers and consumers. Next to that we supply Skedco rescue equipment to our dealers who will benefit from exclusive dealership arrangements, such as: best prices, rapid delivery, local training and product selection assistance. We are always looking for new partners to expand our sales network all over Europe.

### WORK AT HEIGHT TRAINING

Our training provides simple steps and practical measures, with the necessary skills and knowledge, to prevent accidents when working at height.

### WORK ON ROOFS TRAINING

This training applies to a wide range of work situations where workers are placed in a position from which falls are possible. Like repair and maintenance work on roofs.

### TRAINING ROPE ACCESS

Our training ensures that workers are fit to climb and perform rescues in a safe working environment. It is a good starting point for numerous jobs on and offshore.

### CONFINED SPACE TRAINING

This training is for people whose jobs involves being in confined spaces. Learn how to minimise risks in a dangerous and poorly ventilated environment.

### RESCUE TRAINING

Our training provides the most current safety and rescue information and tools. We can help you decide on the best approach to your site, job, and task/operations.
