- (13) 13.1 Subject and Type
Rescue system
Type: Rapid Extraction Sked

13.2 Description

The rescue system, type: Rapid Extraction Sked (Fig. 1), is used to transport an immobile person in vertical or horizontal position.

The rescue system is a rollable plastic shield (Rapid Extraction Sked Strecher) measuring approximately 2.40 x 0.70 m, with two handles on each long side. There are also four straps with an adjustment device on the side, which can be used to mould the stretcher and hold the person in place. Further straps and a handle for pulling the stretcher are attached on the head and food ends.

The resue system includes two rescue loops, type: Horizontal Lift Sling, a connecting element, type: Steel Locking 'D'Carabine and a lanyard, type: Sked Tow Strap.
