

HARKEN WINCH POWER TOOL ADAPTER

This Power Tool Adapter enables the use of a drill to drive Harken's LokHead Winch and Traction Winch 500. It fits all standard drill chucks and can be used with drill speeds up to 60 RPM. For drill speeds up to 300 RPM, the Power Tool Adapter must be used with the Harken Protect Connect. The Power Tool Adapter and a drill may be used with the NFPA-certified LokHead Winch Fire/Rescue Kit for human suspension. Likewise, using this adapter, a drill, the Traction Winch 500, and an NFPA-certified descent control device such as the CLUTCH as a progress capture device will satisfy the requirements of NFPA. Please note that use of a drill and this adapter to move personnel is not compliant with EN13157 which governs only hand-powered machines.

PRODUCT NAME	DRILL ADAPTER, POWERED CRANK HANDLE, HARKEN
WEIGHT	71 G (2.5 OZ)
LENGTH	47.5 MM (1 7/8 IN)
WIDTH	25.5 MM (1 IN)
