

ATOM™ CHEST ASCENDER KIT

The ATOM Chest Ascender Kit is a specialized solution for affixing certain chest ascenders to the CMC ATOM Harness. This kit includes one sewn ATOM Ascender Strap (part # 067022) and one 8MM Delta Quick Link (part # 038208). These parts are also available for individual purchase. For installation instructions, please watch the videos available on this page.

The ATOM Chest Ascender Kit is compatible with the Climbing Technology [Chest Ascender HC](#) and Chest Ascender +, and the Petzl Croll small and large. For attaching the [Harken Ninja MultiAscend](#), we recommend using the [ATOM MultiAscend Strap \(part # 343580\)](#), which is designed to provide the optimal orientation and fit for smooth operation.

To order your ATOM Harness with the chest ascender already installed, check out our [Build Your Own Models](#).

**** ATOM CHEST ASCENDER KIT DOES NOT INCLUDE A CHEST ASCENDER, CHEST ASCENDER MUST BE PURCHASED SEPARATELY *****
