

LOTUS TECH PACK[™]

We've updated the Lotus! Photos and details below!

Built for traveling rope technicians, the Lotus is a combination backpack and duffel bag that zips open from all sides and lays flat for maximum access to essential equipment. Our improved version of the Lotus has greater mesh pocket durability, sewn-in gear loops and compression straps, smoother zippers, more secure shoulder and waist strap stowage, stronger duffel and dorsal handles, and color-coded zipper pulls to indicate the optimal location for easy side access.

The Lotus provides 4 exterior pockets and 7 interior pockets for easy organization of personal gear. Items are readily visible inside the mesh pockets, which are placed over the contrasting light gray background of the Lotus interior. The protective storage pocket is ideal for stowing a laptop, ipad, or other surface. Versatile gear loops and compression straps are sewn into the pack in key areas, enhancing equipment storage.

Named after the iconic Lotus Tower, this pack is designed for working at height and taking abuse. The durable black exterior is Double Ripstop Nylon with Carbonate coating on both sides for superior abrasion and water resistance. Heavy duty zippers around the Lotus are fitted with reflective pulls and stored in protective garages. The Lotus includes a removable waist belt and a ground cloth to protect gear as it comes out of the pack. Born to travel, the Lotus has a business card / team card holder, Velcro strip for patches and ID, and fits nicely in overhead bins. Take it anywhere, anytime, for any job.

Improvements:

- Higher strength dorsal and duffel handles for use as haul points
 - Dorsal Handle Working Load Limit: 60 lbs
 - Duffel Handles (used together) Working Load Limit: 100 lbs
- More durable mesh fabric for internal pockets that is still see-through
- Smoother zipper with color-coded pulls for optimal positioning
- Cleaner stowage options for shoulder straps and waist belt
- Improved back panel stitching and shoulder strap shape
- Sewn-in gear loops and compression straps for greater stability

- Added foam in the padded laptop pocket for secure traveling

Features:

- Designed to carry personal kit and essential technical equipment
- Zips completely flat to provide immediate access to organized gear
- Opens on the top, bottom, and side to easily reach buried items
- Carries as a duffel or backpack with comfortable, breathable suspension
- Stowage options for shoulder straps, waist belt, and duffel handle
- 4 exterior pockets located on different sides of the bag
- 7 interior pockets: 1 mesh stow, 5 mesh zip, and 1 large zip
- Gray interior provides contrast to see stowed equipment
- Padded exterior pocket for a laptop, ipad, or other surface
- Sewn gear loops and compression straps in key areas
- Reflective zipper pulls and protective zipper garages
- Business / team card holder, fits CMC's [Rope Bag Card Set](#)
- Velcro strip for patches and other personal identification
- Ground cloth included in bottom pocket for laying out gear
- Sized to fit inside overhead bins as a carry-on for airplanes
- Main fabric: 840D Nylon Double Ripstop with Carbonate coating
- Carbonate is a special PU coating that is resistant to water and abrasion
- Interior fabric: Nylon 210T Taffeta Ripstop with water-resistant coating

Note: video shows the previous version of the Lotus Tech Pack and will be updated.
